INSPIRATION

MIX

WOOD
ELEMENT

METAL
DETAILS

Il calore del legno e la sua natura eco sostenibile, unita al metallo, sfruttato per la sua resistenza strutturale ma esaltato nei dettagli.

Questo il concept della nuova linea Essence. Dettagli non solo formali: Essence nasconde un innovativo sistema a cremagliera.

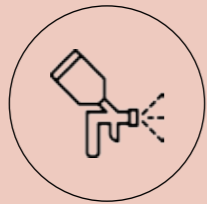

The warmth of wood and its eco-friendly nature together with metal, which is employed for its structural strength but is enhanced in every detail.

This is the concept of the new Essence line. Not only formal details: Essence hides an innovative upright system.

ESSENCE CAPSULE COLLECTION

“il nuovo sistema di arredo negozio nel rispetto dell’ambiente”

“the new shopfitting system that respects the environment”

I legni pregiati certificati FSC si uniscono ad elementi in metallo per dare vita alla nuova linea Essence, l’innovativo sistema espositivo che unisce design e filosofia green.

Ecologica, grazie alla verniciatura all’acqua, sostenibile perchè realizzata con legno proveniente da foreste consapevolmente gestite, e completamente plastic-free dall’imballo alla struttura.

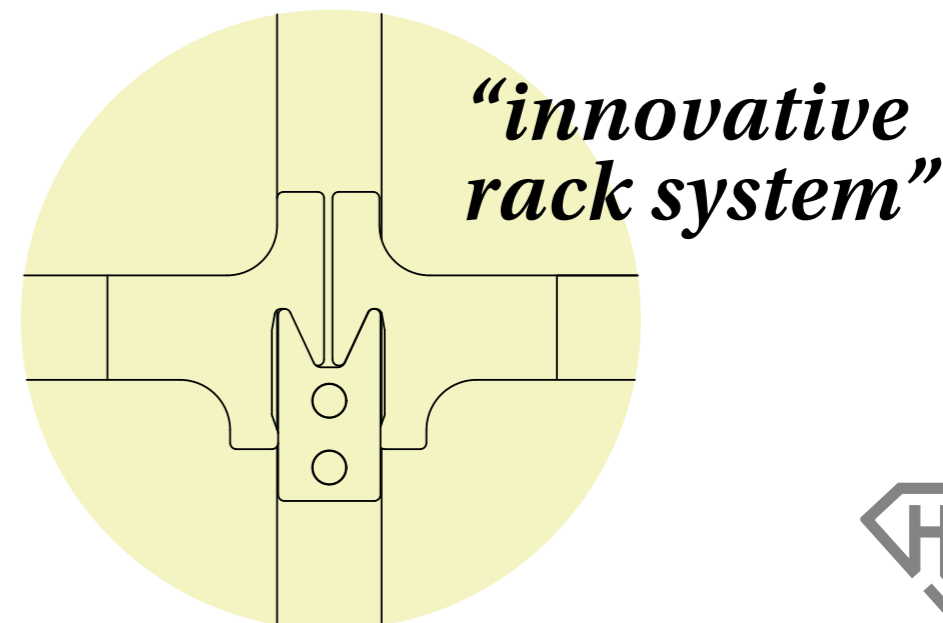

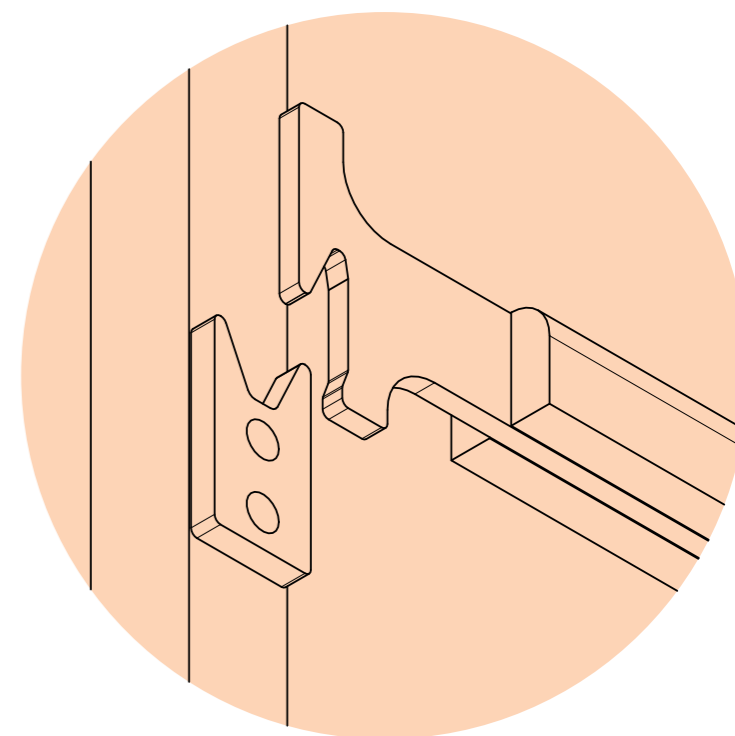

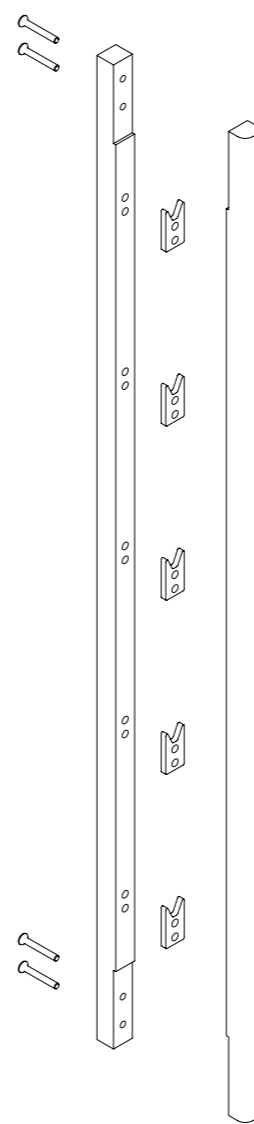

Essence rivoluziona il modo di pensare l’arredo negozio nel rispetto dell’ambiente.

Precious FSC certified woods combine with metal parts to give life to the new Essence Line, the innovative display system which blends together design and green philosophy.

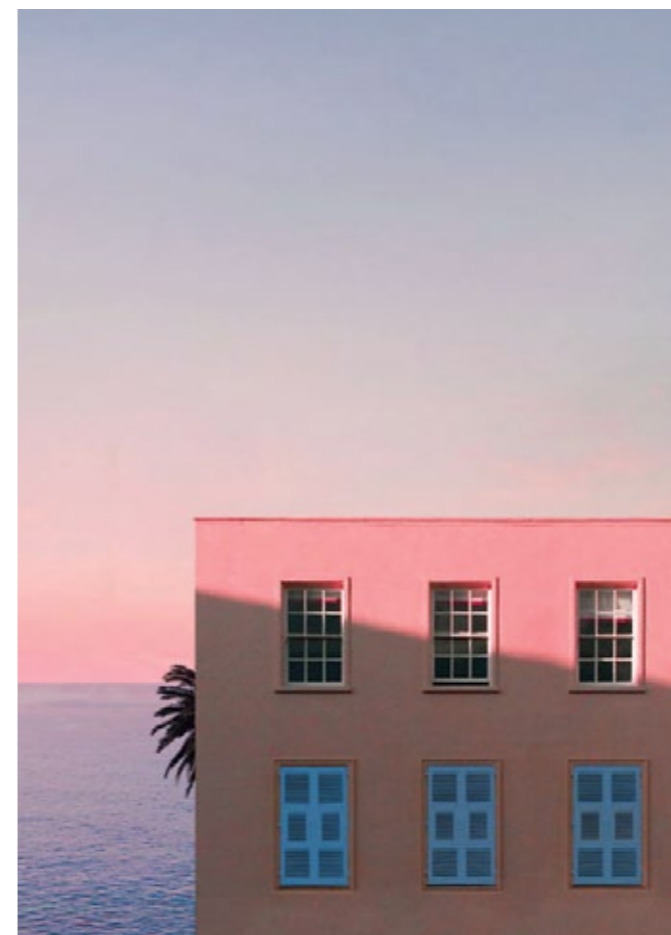

Essence is eco-friendly, thanks to the use of water-based paints; sustainable, thanks to its woods coming from forests under responsible management; totally plastic-free, from the packaging to the structure.

Essence starts a revolution in the way of thinking about shopfittings while respecting the environment.
